

HOW TO SORT WASTE

“When the bins without a lid are full, use the lid of the others to open them.”

In memory of Dormitory Council 2022

Some advice:

BLACK CONTAINER - MIXED WASTE - spoiled food, almost everything

- put anything you don't know where it belongs here

YELLOW CONTAINER - PLASTIC WASTE - foils, plastic bags, pressed PET bottles and many other plastic products, foam polystyrene

- make sure that the bottle is not dirty from oil

BLUE CONTAINER - PAPER - magazines, newspapers, workbooks, boxes, paper

- make sure that the paper is not dirty from food

GREEN CONTAINER - GLASS - bottles from wine, ketchup bottles, jar of marmalade

BLACK CONTAINER WITH ORANGE LID - BEVERAGE CARTONS - boxes from juice, wine, milk and dairy products

GRAY CONTAINER - METAL - metal tins, cans from cola or beer

- make sure that the tin is not dirty from food/drinks

BROWN CONTAINER - BIO WASTE - organic plant waste such as leftover fruit and vegetables or leaves from plants

- do not throw anything else here, such as meat products or any packages
